

LIST OF PUBLICATIONS:

1. The representability of algebroidal functions by superpositions of analytic functions and of algebroidal functions of one variable. “Functional Analysis and its applications”, V. 4, N2, 74–79, 1970; translation in *Funct. Anal. Appl.* 4 (1970), no. 2, 152–156.
2. Superpositions of holomorphic functions with radicals. “Uspehi Matem. Nauk”, V. 26, N2, 213–214, 1971 (Russian Math. Surveys).
3. The representability of functions in quadratures, “Uspehi Matem. Nauk”, V. 26, N4, 251–252, 1971 (Russian Math. Surveys).
4. Riemann surfaces of functions, representable in quadratures, Reports of VI All-Union Topological Conference, Tbilisi, 1972.
5. The representability of function by quadratures, PhD, Moscow, 1-76, 1973.
6. (with Yu. Ilyashenko) Galois theory of systems of Fuchs-type differential equations with small coefficients, Preprint IPM N117, 1974.
7. (with D. Bernstein and A. Kushnirenko) Newton Polyhedra, “Uspehi Matem. Nauk”, V. 31, N3, 201–202, 1976 (Russian Math. Surveys).
8. (with D. Bernstein and A. Kushnirenko) Mixed volumes of Newton Polyhedra, Milnor’s numbers and numbers of solutions of algebraic equations, “Uspehi Matem. Nauk”, V. 31, N3, 196, 1976 (Russian Math. Surveys).
9. Newton polyhedra, and toroidal varieties, “Functional Analysis and its applications”, V. 11, N4, 56-64, 1977, translation in *Funct. Anal. Appl.* 11 (1977), no. 4, 289–296 (1978).
10. Newton Polyhedra and the genus of complete intersections, “Functional Analysis and its applications”, V. 12, N1, 51–61, 1978; translation in *Funct. Anal. Appl.* 12 (1978), no. 1, 38–46 (1978).
11. Newton Polyhedra and the Euler-Jacoby formula “Uspehi Matem. Nauk”, V. 33, N6, 237–238, 1978; translation in *Russian Math. Surveys* 33 (1978), no. 6, 237–238.
12. (with L. Kantorovich) The principle of differential optimization in application to a one-product dynamic model of the economy “Siberian Math. J.”, v. 19, N5, 1053-1064, 1978; translation in *Siberian Math. J.*, V. 19, no. 5, 744–752 (1979).
13. Explicit solutions in the one-sectorial model of economics with continuously distributed funds, “Sbornik Trudov VNIISI”, N9, 235–240, 1978.
14. Exponential growth in the one-sectorial model of economics with continuously distributed funds, “Sbornik Trudov VNIISI”, N9, 25–36, 1978.
15. (with L. Kantorovich) Analysis of dynamics of economic parameters in the models with continuously distributed funds, “Sbornik Trudov VNIISI”, N9, 5–25, 1978.
16. Index of a polynomial vector field, “Functional Analysis and its applications”, v.13, N1, 49-58, 1979; translation in *Funct. Anal. Appl.* 13 (1979), no. 1, 38–45 (1979).
17. The explicitness of Petrovsky-Olejniki inequalities, “Uspehi Matem. Nauk”, V. 34, N3, 223, 1979 (Russian Math. Surveys).

18. Geometry of convex polyhedra and algebraic geometry, "Uspehi Matem. Nauk", V. 34, N4, 160–161, 1979 (Russian Math. Surveys).
19. (with G.S. Khovanskii) Transformation of the nomograms consisting of aligned points and with parallel index into nomograms of C of equidistant points. "Doklady AN SSSR", V. 248, N 3, 535–538, 1979; translation in Soviet Math. Dokl. Vol. 20 (1979) no. 5, 1041–1048.
20. On a class of systems of transcendental equations, "Doclady AN SSSR", V. 255, N4, 804–807, 1980; translation in Soviet Math. Dokl. V. 22, (1980) no. 3, 762–765.
21. (with O. Gelfond) Real Liouville functions. "Functional Analysis and its applications", v. 14, N 2, 52–53, 1980; translation in Funct. Anal. Appl. 14 (1980), no. 2, 122–123 (1980).
22. Rectification of circles. "Siberian Mathematical Journal", V. 21, N4, 221–226, 1980; translation in Siberian Math. J. V. 21 (1981), no. 4, 649–652.
23. On numbers of solutions of real equations, "Uspehi Matem. Nauk", V.35, N5, 213, 1980 (Russian Math. Surveys).
24. Straightening of parallel curves. "Doclady AN SSSR", V. 250, N1, 1074–1076, 1980; translation in Soviet Math. Dokl. V. 21 (1980), no. 1, 284–286.
25. Theorem de Bezout pour les fonctions de Liouville, Preprint IHES, 81/85, 1–31, 1981.
26. Sur les racines complexes de systemes d'equations algebratiques avant un petit nombre de monomes, C.R.Acad. Sc. Paris, V. 292, 937–940, 1981.
27. (with G.S. Khovanskii) Representation of classical canonical nomographic forms with oriented transporant and circular nomograms. "Trudy Seminara po nomografii", 50–52, 1981.
28. Newton Polyhedra and the index of a vector field, "Uspehi Matem. Nauk", v.36, N4, 234, 1981 (Russian Math. Surveys).
29. (with L. Korkina) Golden rule for the two-sectorial models of economic growth, "Trudy Seminara Slozhnykh System", 11–18, 1981.
30. Local multiplicity of a holomorphic map, in the book "Singularities of differential maps" by V.Arnold et al, 66–89, 1981.
31. On estimation of real solutions number, "Uspehi Matem. Nauk", V. 37, N1, 165, 1982 (Russian Math. Surveys).
32. (with G.S. Khovanskii) Transformation of nomograms from aligned points and with a parallel index into nomograms from equidistant points, and investigation of their adaptability. "Nomograficheskii Sbornik", V. 14, 56–77, 1982.
33. (with G.S. Khovanskii) Methods of nomographing some relations, based on the use of two-parameter families of lines, circles and ellipses. "Nomograficheskii Sbornik", V. 14, 70–105, 1982.
34. (with L. Korkina) Principle of differential optimization and economic model, "Trudy VNIISI", N8, 3–10, 1982.

35. Newton Polyhedra (resolutions of singularities), Current problems in mathematics, Vol. 22, 207–239, Itogi Nauki i Tekhniki, Akad. Nauk SSSR, Vsesoyuz. Inst. Nauchn. i Tekhn. Inform., Moscow, 1983.
36. (with L.Kantorovich and L.Korkina) Asymptotic optimization in two-sectorial economics, “Siberian Math. J.”, V. 24, N5, 71–75, 1983; translation in Siberian Math. J. V. 24 (1983), no. 5, 704–708 (1984).
37. (with L.Kantorovich and L.Korkina) Optimization in continuous and discrete models of two-sectorial economics, “Trudy VNIISI”, N9, 14–20, 1983.
38. (with V.Arnold, A.Varchenko, A.Givental) Singularities of functions, wave fronts, caustics, and multidimensional integrals, Translated from the Russian. Soviet Sci. Rev. Sect. C: Math. Phys. Rev., 4, Mathematical physics reviews, Vol. 4, 1–92, Harward Academic Publ., Chur, 1984.
39. Fewnomials and Pfaff manifolds, Proceedings of the International Congress of Mathematicians, Vol. 1, 2 (Warsaw, 1983), 549–564, PWN, Warsaw, 1984.
40. Cycles of dynamic systems on a plane and Roll theorem, “Siberian Mathematical Journal”, v. 25, N3, 198–203, 1984; translation in Siberian Math. J. V. 25 (1984), no. 3, 502–506 (1985).
41. Real analytic manifolds with the property of finiteness, and complex abelian integrals, “Functional Analysis and its applications”, V. 18, N2, 40–50, 1984; translation in Funct. Anal. Appl. 18 (1984), no. 2, 119–127 (1984).
42. Mixed volumes, “Uspehi Matem. Nauk”, V. 39, N5, 227–228, 1984 (Russian Math. Surveys).
43. On analogues of Alexandrov-Fenchel inequalities for hyperbolic forms, “Doklady AN SSSR”, V. 276, N6, 1332–1334, 1984; translation in Soviet Math. Dokl. V. 29(1984), no. 3, –.
44. (with A. Varchenko) On asymptotic behavior of integrals on vanishing cycles, “Doklady AN SSSR”, v.283, N3, 521–525, 1985; translation in Soviet Math. Dokl. V. 32 (1985), no. 1, 122–127.
45. (with L. Korkina) Two-sectorial economics with different amortization coefficient in different sectors, All-Union Conference on Systems Studies, 135–137, 1985.
46. (with L. Kantorovich and L. Korkina) Comparing of different models of economic growth, “Trudy VNIISI”, 3–12, 1985.
47. “Linear programming and geometry of convex polyhedra”, “Trudi VNIISI”, 73–80, 1985.
48. “Linear programming and generalization of Nikulin’s theorem”, “Trudi VNIISI”, 81–86, 1985.
49. Hyperplane sections of polyhedra, toric varieties and discrete groups in Lobachevsky space, “Functional Analysis and its applications”, V. 20, N 1, 50–61, 1986; translation in Funct. Anal. Appl. V. 20 (1986), no. 1, 41–50 (1986).
50. (with V.I.Danilov) Newton polyhedra and an algorithm for calculating Hodge-Deligne numbers, “Izvestia AN SSSR”, Ser. Mathematica, v.50, N5, 925–945, 1986; translation in Math. USSR - Izv. 29(1987), No. 2, 279–298.

51. Comparing of different kinds of estimations for different small dimensional economical models, "Trudy VNIISI", 10–23, 1987.
52. Algebra and mixed volumes "A Series of geometry (Y. D. Burago and V. A. Zalgaller, eds)", Springer-Verlag, Berlin and New York. V. 285, 182-207, 1988.
53. Newton Polyhedra and fewnomials, Russian Doctoral thesis, Moscow, 1-332, 1988.
54. Newton Polyhedra (algebra and geometry), Proceedings of XIII All-Union School on the Operator Theory in Functional Spaces, Kujbishev, 202-221, 1989; translation in Amer. Math. Soc. Transl. (2) v. 153, 1992, 183–199.
55. (with Khovanskiĭ, G. S.) Investigation of methods for the representation of the equation $(f_{34} - f_{12})/(g_{34} - g_{12}) = (f_{56} - f_{12})/(g_{56} - g_{12})$ by nomograms with a directed transparent carrying a curvilinear index. Nomography collection, No. 16, 63–81, 194, Akad. Nauk SSSR, Vychisl. Tsentr, Moscow, 1990
56. (with Yu. Ilyashenko) Galois groups, Stocks operators and theorem of Ramise, "Functional Analysis and its applications", v.24, N4; 31–42, 1990; translation in Funct. Anal. Appl. 24 (1990), no. 4, 286–296 (1991).
57. "Fewnomials" - AMS translated monographs, USA, V.88, viii+139, 1991.
58. (with A. Pukhlikov) Finitely additive measures of virtual polytopes, "Algebra and Analysis", v.4, N2, 161-185, 1992; translation in St. Petersburg Math. J. 4 (1993), no. 2, 337–356.
59. (with A. Pukhlikov) A Riemann-Roch theorem for integrals and sums of quasipolynomials over virtual polytopes, "Algebra and Analysis", v.4, N4, 188-216, 1992; translation in St. Petersburg Math. J. 4 (1993), no. 4, 789–812.
60. Newton polyhedron, Hilbert polynomial and the number of points in sums of finite sets, "Functional Analysis and its Applications", V.26, N4, 57-63, 1992; translation in Functional Anal. Appl. 26 (1992), no. 4, 276–281 (1993).
61. (with J.-M. Kantor) Integral points in integral polyhedra, Preprint IHES, France, 1992.
62. (with J.-M. Kantor) Une application du Theoreme de Riemann-Roch combinatoire au polynome d'Ehrhart des polytopes entier de \mathbb{R} , C. R. Acad. Sci. Paris. Ser.I, V.317, 501-507, 1993.
63. (with A. Pukhlikov) Integral transforms based on Euler characteristic and their application, "Integr.transform and special function", V.1, N.1, 30-36, 1993.
64. Topological obstructions for representability of functions by quadratures, "Journal of dynamical and control systems", V.1, N.1, 99-132, 1995.
65. Sums of finite sets, orbits of commutative semigroups and Hilbert function, "Funkts. analiz", V.29, N.2, 36-50, 1995; translation in Funct. Anal. Appl. 29 (1995), no. 2, 102–112
66. (with S. Zdravkovska) Branched covers of S^2 and braid groups, "Journal of Knot Theory and its Ramifications", V. 5, N. 1, 55-75, 1996.

67. (with O. Gelfond) Newton polyhedra and Grothendieck residues “Doklady RAN”, V.3, N.350, 298-300, 1996; translation in Doklady Mathematics v 54, no. 2, 1996, 700–702.
68. (with S. Yakovenko) Generalized Rolle theorem in R^n and C , “Journal of dynamical and control systems”, V.2, N.1, 103-123, 1996.
69. (with G.S. Khovanskii, E.G. Kozlova) On some questions of theoretical and applied Nomography, “Computer Center of the Russian Academy of Sciences” Computer Center RAN, 96 pp., 1996.
70. Fewnomials, “PHASIS Publishing House”, Moscow, xii+217 pp., 1997.
71. Newton polytopes, curves on toric surfaces, and inversion of Weil’s theorem, “Uspekhi matematicheskikh nauk”, V.52, N.6(318), 113–142, 1997; translation in Russian Math. Surveys 52 (1997), no. 6, 1251–1279.
72. Consistent partitions of polytopes and polynomial measures, Topics in Singularity Theory: V.I. Arnold’s 60th Anniversary Collection, Amer. Math. Soc. Transl., Ser. 2, Vol. 180, Amer. Math. Soc., Providence, RI, 1997, 157–166.
73. Topics in Singularity Theory: V.I. Arnold’s 60th Anniversary Collection, Amer. Math. Soc. Transl., Ser. 2, Vol. 180, Amer. Math. Soc., Providence, RI, 1997, Editor.
74. On a lemma of Kontsevich, “Funkts. analiz”, V. 31, N.4, 89-91, 1997; translation in Funct. Anal. Appl. 31 (1997), no. 4, 296–298 (1998)
75. (with others) Vladimir Igorevich Arnol’d (on the occasion of his sixtieth birthday). “Uspekhi mat. nauk”, V.52, N5(317), 1997, 235–255; translation in Russian Math. Surveys 52 (1997), no. 5, 1117–1139.
76. Boundary indexes of 1-forms with homogeneous polynomial coefficients, “Algebra and Analysis”, V.10, N.3, 1998, 193–222; translation in St. Petersburg Math. J. 10 (1999), no. 3, 553–575.
77. (with A. Gabrielov) Multiplicity of a Noetherian Intersection, Geometry of Differential Equations, Amer. Math. Soc. Transl., Ser. 2, Vol. 186, Amer. Math. Soc., Providence, RI, 1998, 119–130.
78. Geometry of Differential Equations, Amer. Math. Soc. Transl., Ser. 2, Vol. 186, Amer. Math. Soc., Providence, RI, 1998, Editor.
79. Newton polyhedrons, a new formula for mixed volume, product of roots of a system of equations, The Arnoldfest, Proceedings of a Conference in Honor of V.I. Arnold for his Sixtieth Birthday, Fields Institute Communications, Vol. 24, Amer. Math. Soc., Providence, RI, 1999, 325–364.
80. The Arnoldfest, Proceedings of a Conference in Honor of V.I. Arnold for his Sixtieth Birthday, Fields Institute Communications, Vol. 24, Amer. Math. Soc., Providence, RI, 1999, Editor.
81. Families of sections of quadrics and classical geometries, “Funkts. analiz”, V. 34, N.3, 91–95, 2000; translation in Funct. Anal. Appl. 34 (2000), no. 3, 235–238 (2000).
82. Geometrical generalizations of a problem about transformation of the nomograms consisting of aligned points into nomograms consisting of equidistant points, Nomography collection, No. 17, RAN, Vychisl. Tsentr 73–88, 2000.

83. On the continuability of multivalued analytic functions to an analytic subset, “Funkts. analiz”, V. 35, N.1, 62–73, 2001; translation in *Funct. Anal. Appl.* 35 (2001), no. 1, 51–59 (2001).
84. Three lectures on Newton polyhedra, “Newton polyhedrons and Singularities”, proceeding of workshops, 28-31 May, 2001, RIMS, Kyoto. *Kokyuroku* no 10, 1–17, 2001.
85. Polynomial equations with generic Newton polyhedra, Mathematisches Forschungsinstitut Oberwolfach, Report No. 2/2001, “Combinatorial Convexity and Algebraic Geometry”, January 14-20, 2001.
86. (with O. Gelfond) Toric geometry and Grothendieck residues, “Moscow Mathematical Journal” V. 2, no 1, 2002, 99–112.
87. On the monodromy of a multivalued function on it’s ramification set, “Funkts. analiz”, Vol. 37, No 2, 2003, 65–74. translation in *Funct. Anal. Appl.* 37 (2003), no. 2, 134–141 (2003).
88. Three lectures on Fewnomials and Noetherian intersections, Proceeding of workshop, November 5–8, 2002 in “RIMS Kokyuroku” Series, Kyoto no 6, 42–72, 2003.
89. A topological version of Galois theory, Proceeding of International Conference “Kolmogorov and Cotemporary Mathematics”, 777–780, 2003.
90. (with D. Novikov) L -convex-concave sets in real projective space and L -duality, “Moscow Mathematical Journal”, Vol. 3, No. 3, 2003, 1013–1037.
91. (with D. Novikov) L -convex-concave body in $\mathbf{R}P^3$ contains a line, “Geometric and Functional Analysis (GAFA) ”, Vol. 13 (2003) 1082–1118.
92. On the nonrepresentability of functions of several variables by quadratures “Funkts. analiz”, Vol. 37, No 4, 2003, 74–85; translation in *Funct. Anal. Appl.* 37 (2003), no. 4, 302–310 (2003).
93. Complex calculus, MCCME, Moscow, 2004, 48 pp.
94. Résolubilité des équations par formules explicites (théorie de Liouville, théorie de Galois différentielle et obstructions topologiques). In book: Alekseev. Le theoreme d’Abel : un cours d’Arnold, Vuibert, Cassini, 2004 (French translation).
95. Solvability of equations by explicit formulae. In book: V.B. Alekseev. Abel’s Theorem in Problems and Solutions Based on the lectures of Professor V.I.Arnold, Kluwer Academic Publishers, 2004, 221–263.
96. (with D. Novikov) Comments to the Arnold problem 1987-4. In book: English translation “Arnold’s Problems”, Springer-Verlag, Berlin PHASIS, Moscow, 2004, p. 457–458.
97. Solvability of equations in finite terms, “Uspehi Matem. Nauk”, Vol. 59, No. 4(358), 2004, 69–146; translation in *Russian Math. Surveys* 59 no. 4 (2004), 661–736.
98. *Journal of Complexity*. Special Issue: Foundations of Computational Mathematics 2002 Workshops. Vol. 21, no. 1 (2005). Guest Editor.
99. Combinatorics of sections of polytopes and Coxeter groups in Lobachevsky spaces, Proceedings of the International Conference “Coxeter Legacy: Reflections and Projections”, Fields Institute Communications, American Mathematical Society, Providence, RI. Vol. 46, 2005, 129–157.

100. (with S. Chulkov) Hilbert and Hilbert–Sammuel polynomials and partial differential equations, “Matematicheskie zametki”; translation in Mathematical Notes, Publisher: Consultants Bureau, An Imprint of Springer Verlag New York LLC, Vol. 77, No. 1–2, 2005, 130–139.
101. (with Anosov D., Arnold V., Glutsyuk A., Gorodetski A., Kaloshin V., Katok A., Lando S., Sossinsky A., Tsfasman M., Yakovenko S.) Yulij S. Ilyashenko. Mosc. Math. J. 5, no. 1, front matter, 2005.
102. (with T. Fukui) Mapping degree and Euler characteristic, “Kodai Mathematical Journal”, Vol. 29, 2006, 144–162.
103. (with S. Chulkov) Hilbert polynomial for systems of linear partial differential equations with analytical coefficients, “Izvestiya RAN”, Vol. 70(2006), no. 1, 2006.
104. An analog of determinant related to Parshin-Kato theory and integral polyhedra, “Funkts. analiz”, Vol. 40, No 2, 2006, 55–64; translation in Funct. Anal. Appl. 40 (2006), no. 2, 126–133 (2006).
