## Today's topics and news

- Topic: Absolute values, intuitive definition of the limit
- Homework: Watch videos 2.5 and 2.6 for Wednesday.

## All 0s?

## Theorem

$\forall N \in \mathbb{N}$, in every set of $N$ MAT137 students, those students will get the same grade.

## Proof.

- Base case. It is clearly true for $N=1$.
- Induction step.

Assume it is true for $N$. I'll show it is true for $N+1$.
Take a set of $N+1$ students. By induction hypothesis:

- The first $N$ students have the same grade.
- The last $N$ students have the same grade.

Hence the $N+1$ students all have the same grade as well.

## Properties of inequalities

Given $a, b, c \in \mathbb{R}$.
Assume $a<b$. What can we (always) conclude?
(1) $a+c<b+c$
(2) $a-c<b-c$

- $a c<b c$
- $a^{2}<b^{2}$
- $\frac{1}{a}<\frac{1}{b}$

## Properties of absolute value

Given $a, b \in \mathbb{R}$. What can we (always) conclude?

- $|a b|=|a||b|$
- $|a+b|=|a|+|b|$

## Sets described by distance

Given $a \in \mathbb{R}$. Given $\delta>0$.
What are the following sets? Describe them in terms of intervals.

1. $A=\{x \in \mathbb{R}:|x|<\delta\}$
2. $B=\{x \in \mathbb{R}:|x|>\delta\}$
3. $C=\{x \in \mathbb{R}:|x-a|<\delta\}$
4. $D=\{x \in \mathbb{R}: 0<|x-a|<\delta\}$

## Implications

Find all positive values of $A, B$, and $C$ which makes the following implications true.

1. $(\forall x \in \mathbb{R}),|x-3|<1 \Longrightarrow|2 x-6|<A$.
2. $(\forall x \in \mathbb{R}),|x-3|<B \Longrightarrow|2 x-6|<1$.
3. $(\forall x \in \mathbb{R}),|x-3|<1 \Longrightarrow|x-3.5|<C$.

## Limits from a graph

Do the following limits exist?
(1) $\lim _{x \rightarrow 2} f(x)$
(2) $\lim _{x \rightarrow 0} f(f(x))$

## Limits from a graph

Find the value of
(1) $\lim _{x \rightarrow 2} f(x)$
(2) $\lim _{x \rightarrow 0} f(f(x))$
(3) $\lim _{x \rightarrow 2}[f(x)]^{2}$
(9) $\lim _{x \rightarrow-3} f(f(x)$

## Floor

Given a real number $x$, we defined the floor of $x$, denoted by $\lfloor x\rfloor$, as the largest integer smaller than or equal to $x$. For example:

$$
\lfloor\pi\rfloor=3, \quad\lfloor 7\rfloor=7, \quad\lfloor-0.5\rfloor=-1
$$

Sketch the graph of $y=\lfloor x\rfloor$. Then compute:
(1) $\lim _{x \rightarrow 0^{+}}\lfloor x\rfloor$
(1) $\lim _{x \rightarrow 0}\lfloor x\rfloor$
(2) $\lim _{x \rightarrow 0^{-}}\lfloor x\rfloor$

- $\lim _{x \rightarrow 0}\left\lfloor x^{2}\right\rfloor$

## More limits from a graph

Find the value of
(1) $\lim _{x \rightarrow 0^{+}} g(x)$
(2) $\lim _{x \rightarrow 0^{+}}\lfloor g(x)\rfloor$
(3) $\lim _{x \rightarrow 0^{+}} g(\lfloor x\rfloor)$
(9) $\lim _{x \rightarrow 0^{-}} g(x)$
(5) $\lim _{x \rightarrow 0^{-}}\lfloor g(x)\rfloor$
(6) $\lim _{x \rightarrow 0^{-}}\left\lfloor\frac{g(x)}{2}\right\rfloor$
(7) $\lim _{x \rightarrow 0^{-}} g(\lfloor x\rfloor)$
