MAT 187H1F Quiz 4
Calculus II
Duration: 30 minutes
Only aids allowed for this quiz: a non-programmable calculator.

Instructions: Present your solutions to the following questions on this sheet, using both sides. Make sure to fill in your name and student number at the top of this sheet.

TOTAL MARKS: 20

1. (5 marks) Find the radius of convergence of the power series \[ \sum_{n=1}^{\infty} \frac{(-e)^n}{n^2} x^n \]

2. (5 marks) Use the Maclaurin series for \( e^{-x^2} \) to find the 5th degree Taylor polynomial of \( f(x) = xe^{-x^2} \) about \( x = 0 \).
3. (5 marks) Find the sum of the power series \( \sum_{n=0}^{\infty} \frac{1}{n^2 + 1} x^{n+2} \).

4. (5 marks) Find the first four non-zero terms of the Maclaurin series of \( f(x) = (1 - 2x)^{-1/3} \), in simplified form.
