

# Printing Instructions

The file "booklet.pdf" is formatted like this.

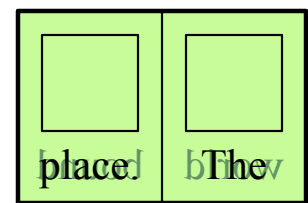

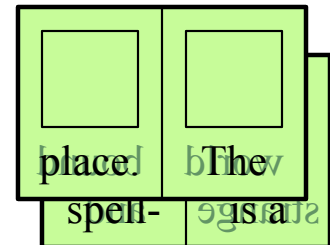

"The world is a strange and spell-bound place."

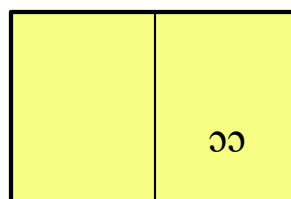

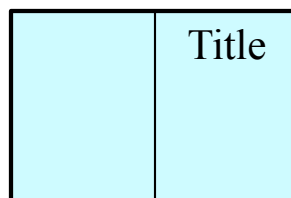

Print the even pages on the backs of the odd ones.

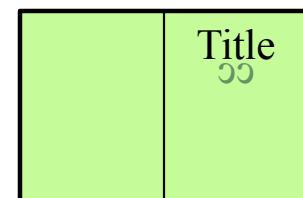

Stack the pages and fold them down the middle.

The file "coversheet.pdf" is formatted just like "booklet.pdf".

Print it on heavy paper and fold it down the middle.

You can bind the book however you want! The technique described by Jaymi Elford at [diyplanner.com/node/442](http://diyplanner.com/node/442) works great.
