Polynomials: Papers

B. Anderson, Polynomial root dragging.
American Math. Monthly 100:9 (November, 1993), 864-865

B. Anderson, Where the inflection points of a polynomial may lie.
Mathematics Magazine 70:1 (February, 1997), 32-39

P. Andrews, Where not to find the critical points of a polynomial – variations on a Putnam theme.
American Math. Monthly 102:2 (February, 1995), 155-158

Enrique Arrondo, Another elementary proof of the Nullstellensatz.
American Math. Monthly 113:2 (February, 2006), 169-171

Robert L. Benedetto, An elementary product identity in polynomial dynamics.
American Math. Monthly 108:9 (November, 2001), 860-864

Soren Boel, Meier Carlsen & Niels Richard Hansen, A useful strengthening of the Stone-Weierstrass Theorem.
American Math. Monthly 108:7 (Aug.-Sept, 2001), 642-643

Matthew Boelkins, Jennifer Miller & Benjamin Vugteveen, From Chebyshev to Bernstein: a tour of polynomials small and large.
College Math. Jour. 37:3 (May, 2006), 194-204

Nigel Boston & Marshall L. Greenwood, Quadratics representing primes.
American Math. Monthly 102:7 (August-September, 1995), 595-599

John Brillhart, Michael Filaseta & Andrew Odlyzko, On an irreducibility theorem of A. Cohn.
Canad. J. Math. 33:5 (1981), 1055-1059

Jason I. Brown & Charles J. Colbourn, Roots of the reliability polynomial.
SIAM J. Disc. Math. 5:4 (November, 1992), 571-585

Holly Carley & Xin Li, The modulus of polynomials with zeros at the roots of unity.
American Math. Monthly 107:8 (October, 2000), 742-748

B.C. Carlson & J. Todd, Zolotarev's first problem – the best approximation by polynomials of degree $\leq n-2$ to $x^n - n\sigma x^{n-1}$ on $[-1, 1]$.
Aequationes Math. 26 (1983), 1-33

Weiyu Chen, On the polynomials with all their zeros on the unit circle.
J. Math. Analysis and Appl. 190 (1995), 714-724

Pantelis A. Damianou, Monic polynomials in $\mathbf{Z}[x]$ with roots in the unit disc.
American Math. Monthly 108:3 (March, 2001), 253-257

José Carlos de Sousa Oliveira Santos, Another proof of the Fundamental Theorem of Algebra.
American Math. Monthly 112:1 (Jan., 2005), 76-78

K. Dilcher, K.B. Stolarsky, Zeros of the Wronskian of a polynomial.
J. Math. Anal. Appl. 116 (1986), 473-488

J.D. Dixon, Polynomials with real roots.
Canad. Math. Bull. 5 (1962), 259-263

Gregory P. Dresden, On the middle coefficient of a cyclotomic polynomial.
American Math. Monthly 111:6 (June-July, 2004), 531-533

D.S. Dummit, Solving solvable quintics.
Math. Comp. 57 (1991), 387-401

William M. Faucette, A geometric interpretation of the solution of the general quartic polynomial.

American Math. Monthly 103:1 (January, 1996), 51-57

Michael Filaseta, A further generalization of an irreducility theorem of A. Cohn.
Canad. J. Math. 34:6 (1982), 1390-1395

Dwight D. Freund, A genuine application of synthetic division, Descartes's rule of signs and all that stuff.
College Math. Journal 26:2 (March, 1995), 106-110

Walter Gautschi, Construction of Gauss-Christoffel quadrature formulas.
Math. of Computation 22 (102) (April, 1968), 251-270.

K. Girstmair, On an irreducibility criterion of M. Ram Murty.
American Math. Monthly 112:3 (march, 2005), 269-270

Louisa S. Grinstein, Upper limits to the real roots of polynomial equations.
American Math. Monthly 60:9 (November, 1953), 608-615

E. Grosswald, Recent applications of some old work of Laguerre.
American Math. Monthly 86:8 (October, 1979), 648-658

A. Joyal, G. Labelle & Q.I. Rahman, On the location of zeros of a polynomial.
Canadian Mathematical Bulletin 10 (1967), 53-63

Dan Kalman, An elementary proof of Marden's theorem.
American Math. Monthly 115:4 (April, 2008), 330-337

Dan Kalman & James E. White, Polynomial equations and circulant matrices.
American Math. Monthly 108:9 (November, 2001), 821-840

J.B. Kelly, On factorization of polynomials.
American Math. Monthly 60:6 (June-July, 1953), 375-379

Emmanuel Kowalski, Bernstein polynomials and Brownian motion.
American Math. Monthly 113 (2006), 865-886

T.Y. Lam & K.H. Leung, On the cyclotomic polynomial $\Phi_{pq}(X)$.
American Math. Monthly 103:7 (Aug.-Sept., 1996), 562-564

Xin Li, R.N. Mohapatra & R.S. Rodriguez, Bernstein-type inequalities for rational functions with prescribed poles. *J. London Math. Soc.* (2) 51 (1995), 523-531

H.E. Lomelí & C.L. Garciá, Variations on a theorem of Korovkin.
American Math. Monthly 113:8 (October, 2006), 744-749

Eugene Lukacs, Applications of Faà di Bruno's formula in mathematical statistics.
American Math. Monthly 62:5 (May, 1955), 340-348

D. Minda & S. Phelps, Triangle, ellipses and cubic polynomials.
American Math. Monthly 115:8 (October, 2008), 679-689

M. Ram Murty, Prime numbers and irreducible polynomials.
American Math. Monthly 109:5 (May, 2002), 269-270

Richard D. Neidinger & R. John Annen, III, The road to chaos is filled with polynomial curves.
American Math. Monthly 103:8 (October, 1996), 640-653

G. Peyser, On the roots of the derivative of a polynomial with real roots.
American Math. Monthly 74:9 (November, 1967), 1102-1104

N.V. Rao, The Stone-Weierstrasss Theorem Revisited.
American Math. Monthly 112:8 (Oct., 2005), 726-729

Allen D. Rogers, Integrals of fitted polynomials and an application of Simpson's Rule.
College Math. Journal 38:2 (March, 2007), 124-130

Michael I. Rosen, Niels Hendrick Abel and equations of the fifth degree.
American Math. Monthly 102:6 (June-July, 1995), 495-505

Walter Rudin, Sums of squares of polynomials.
American Math. Monthly 107:9 (November, 2000), 813-821

Anindya Sen, Fundamental theorem of algebra – yet another proof.
American Math. Monthly 107:9 (November, 2000), 842-843

Robert S. Sery, A new method for finding prime-rich equations of the type $x^2 - x + c$.
J. Recreational Math. 23 (1991), 47-54

Alf van der Poorten & Gerhard Woeginger, Squares from products of consecutive integers.
American Math. Monthly 109:5 (May, 2002), 459-462

Airton von Sohsten de Medeiros, The fundamental theorem of algebra revisited.
American Math. Monthly 108:8 (October, 2001), 759-760
