
VOLUMES – 1

UNIVERSITY OF
TORONTO

February 4th, 2019

For next lecture

For Wednesday (Feb 6), watch the videos:

- Volumes: 10.2
- Sequences: 11.1, 11.2

Find the volume of a ball of radius R by slicing it.

Volume and area of a sphere

Find the volume of a ball of radius R by slicing it.

Volume of a pyramide – *Homework*

Find the volume of the right pyramid of height H and square base with side length L by slicing.

Volume of a pyramid – *Homework*

Find the volume of the right pyramid of height H and square base with side length L by slicing.

Let R be the region in the first quadrant bounded between the curves with equations $y = x^3$ and $y = \sqrt{x}$.

Compute the volume of the solid of revolution obtained by rotating R around...

- 1 ... the x -axis
- 2 ... the y -axis
- 3 ... the line $y = -1$

An equation for volumes by “slicing” – *Homework*

Let $f : [a, b] \rightarrow \mathbb{R}$ be a continuous positive function.

Let R be the region in the first quadrant enclosed between the graph of f and the x -axis.

Find a formula for the volume of the solid of revolution obtained by rotation the region R around the x -axis.
