The Department of Mathematics in the Faculty of Arts & Science is seeking to hire a highly motivated postdoctoral teaching fellow to develop and support curricular and pedagogic initiatives in first and second-year math courses. The successful candidate will teach undergraduate mathematics, as well as develop and implement pedagogical innovations to enhance learning in introductory-level courses. This is an opportunity for mathematicians interested in a teaching career to further develop their teaching skills and to contribute to pedagogical initiatives that enhance the learning experience of undergraduate students.

**Description of duties:**
The successful candidate will work as part of a team that includes mathematics faculty and lead teaching assistants (TAs). The candidate will conduct research on pedagogical techniques to develop instructor and TA training resources and will implement training to support teaching of first-year calculus and introductory linear algebra. The candidate will also work with instructors and TAs to assess the effectiveness of new practices in all course sections, including classroom observation and feedback.

They will be assigned 1.5 full course equivalent (FCE) of teaching in mathematics first or second-year courses in Year 1 of the postdoc. For Year 2 and Year 3, they will teach 2.0 FCEs. They will examine best practices in mathematics education, including identifying and implementing successful evidence-based approaches to teaching within mathematics courses, and researching best practice in pedagogy.

**Salary:** $60,000/year (plus benefits)

**Required qualifications:**
The candidate must have a recent PhD or will obtain a PhD by July 2019 in mathematics, or a related field, with experience teaching mathematics to undergraduates. We will value demonstrated experience in some of the following: course and curriculum development, pedagogical development activities, supervision of TAs, or contributions in the Scholarship of Teaching and Learning. Strong written and oral English communication skills are required, as are the ability to proactively set, prioritize, and accomplish goals. Experience working in teams is strongly desired.

**Application instructions:**
All individuals interested in this position must submit a cover letter, CV, and teaching dossier. We prefer candidates to include three reference letters (to be submitted to https://www.mathjobs.org/jobs by the reviewers themselves). We will however consider
applications submitted by the deadline with reference letters to follow; in the case where reference letters will be sent after the deadline, please indicate in your cover letter the name and contact information of the individuals providing references letters. The cover letter should describe your teaching experience, contributions in pedagogical development, pedagogical scholarship (e.g., interests, presentations, publications), along with long-term career goals, and their fit with the focus of this call.

Please submit these materials online at: https://www.mathjobs.org/jobs/jobs/13590.

Closing date: Tuesday, February 19, 2019

Supervisor: Jeremy Quastel, Chair, Department of Mathematics

Expected start date: July 1, 2019

Term: 36 months

FTE: The normal hours of work are 40 hours per week for a full-time postdoctoral fellow (prorated for those holding a partial appointment) recognizing that the needs of the employee’s research and training and the needs of the supervisor’s research program may require flexibility in the performance of the employee’s duties and hours of work.
