

January 2007

PUBLICATIONS

- 94 Intersection of conjugacy classes with Bruhat cells in Chevalley groups: The cases $SL_n(K)$, $GL_n(K)$. (with Nikolai Gordeev) *J. Pure Appl. Algebra* **209** (3) 703–723 (2007)
- 93 Hermitian presentations of Chevalley groups II. (with M. P. De Oliveira) *J. Algebra* **302** (1) (2006) 70–115; MR2236595
- 92 The Coxeter Legacy — Reflections and Projections. (Editor, together with Chandler Davis). American Mathematical Society and Fields Institute for Research in Mathematical Sciences; Providence, RI; Toronto, Ontario; March 2006
- 91 Siegel transformations for even characteristic. (with O. Villa) *Linear Algebra Appl.* **395C** (2005) 163–174
- 90 Hermitian presentations of Chevalley groups I. (with M. P. De Oliveira) *J. Algebra* **276** (1) (2004) 371–382
- 89 Conjugacy classes of involutions in the Lorentz group $\Omega(V)$ and in $SO(V)$. *Linear Algebra Appl.* **383C** (2004) 77–83
- 88 The special orthogonal group is trireflectional. (with O. Villa) *Arch. Math.* **82** (2) (2004) 122–127
- 87 Intersection of conjugacy classes with Bruhat cells in Chevalley groups. (with N. Gordeev) *Pacific J. Math.* **214**(2) (2004) 245–261
- 86 Harold Scott MacDonald Coxeter 1907–2003. *Proc. Royal Society of Canada, Seventh Series, Volume II* (2003) 60–63
- 85 H. S. M. Coxeter (1907–2003). *AMS Notices* **50**(10) (2003) 1234–1236; reprinted *Mathematics Newsletter, Ramanujan Mathematical Society, India* (**13** (3) (2003) 49–57
- 84 Coxetergruppen - ein Beispiel. *MNU* **56**(7) (2003) 436–437
- 83 In memoriam: H. S. M. Coxeter (1907–2003) *University of Toronto Arts & Sciences Newsletter* Vol.1, Issue 4, May 27, 2003.
- 82 Professor H. S. M. Coxeter (Obituary). *The Independent* No. 5,145; p. 18. London, England, 15 April 2003.
- 81 Products of involutions in the finite Chevalley groups of type $F_4(K)$. (with P. C. Austin) *Comm. Algebra* **30**(8) (2002) 4019–4029.
- 80 Products of transvections in one conjugacy class of the symplectic group over the p-adic numbers. (with Huberta Lausch) *Linear Algebra Appl.* **327** (2001) 151–180.
- 79 Products of involutions in simple Chevalley groups. *J. Geometry* **69** (2000) 68–72.
- 78 Gauss decomposition with prescribed semisimple part: short proof. (with V. Chernousov and N. Gordeev) *J. Algebra* **229** (2000) 314–332.
- 77 Bireflectionality of orthogonal and symplectic groups of characteristic 2. *Arch. Math. (Basel)* **73** (1999) 414–418.
- 76 Intersection of conjugacy classes of Chevalley groups with Gauss cells. (with N. Gordeev) *J. Algebra* **220** (1999) 591–611.
- 75 Covering numbers for Chevalley groups. (with N. Gordeev and M. Herzog) *Israel J. Math.* **111** (1999) 339–372.

- 74 A generalization of Sourour's theorem. (with N. Gordeev) *Linear Algebra Appl.* **286** (1999) 187–196.
- 73 On the conjectures of J. Thompson and O. Ore. (with N. Gordeev) *Trans. Amer. Math. Soc.* **350** (1998) no. 9, 3657–3671.
- 72 Groups satisfying Scherk's length theorem. (with W. Nolte) *J. Geometry* **61** (1998) 39–45.
- 71 Gauss decomposition with prescribed semisimple part in Chevalley groups III: Finite twisted groups. (with N. Gordeev) *Comm. Algebra* **24** 14 (1996) 4447–4475.
- 70 A characterization of subgroups of the orthogonal group. (with W. Nolte) *J. Geometry* **56** (1996) 34–44.
- 69 Gauss decomposition with prescribed semisimple part in Chevalley groups II: Exceptional cases. (with N. Gordeev) *Comm. Algebra* **23** 8 (1995) 3085–3098.
- 68 Products of reflections in one conjugacy class in the orthogonal group over $GF(3)$. *Linear and Multilinear Algebra* **39** 3 (1995) 209–230.
- 67 Gauss decomposition with prescribed semisimple part in classical Chevalley groups. (with N. Gordeev) *Comm. Algebra* **22** 14 (1994) 5935–5950.
- 66 Products of transvections in one conjugacy class in the symplectic group over $GF(3)$. *Linear Algebra Appl.* **202** (1994) 1–24.
- 65 The reflection length of a transformation in the unitary group over a finite field. *Linear and Multilinear Algebra* **35** 1 (1993) 11–36.
- 64 The length problem for the special unitary group generated by positive transvections. (with J. Malzan) *J. Univ. Kuwait (Science)* **20** (1993) 1–24.
- 63 Bireflectionality of the orthogonal group over a valuation domain. (with H. Ishibashi) *J. Algebra* **149** 2 (1992) 322–325.
- 62 Products of positive transvections in the real symplectic group. (with J. Malzan) *Comm. Algebra* **19** 4 (1991) 1033–1058.
- 61 Generators and Relations in Groups and Geometries (Proceedings). (editor together with A. Barlotti, P. Plaumann, K. Strambach) NATO ASI Series C, Vol. 333, Kluwer Academic Publ., Dordrecht, The Netherlands 1991.
- 60 Classical Groups. Generators and Relations in Groups and Geometries (Proceedings), NATO ASI Series C, Vol. 333, Kluwer Academic Publ., Dordrecht, The Netherlands (1991) 1–45.
- 59 Products of λ -transvections in $Sp(2n, q)$. (with J. Malzan) *Linear Algebra Appl.* **146** (1991) 121–132.
- 58 Products of reflections in the kernel of the spinorial norm. (with J. Malzan) *Geom. Dedicata* **36** (1990) 279–285.
- 57 Generators for classical groups of modules over local rings. (with Huberta Lausch) *J. Geometry* **39** (1990) 60–79.
- 56 Automorphisms of split Cayley algebras over real closed fields. (with Huberta Lausch) *Geom. Dedicata* **32** (1989) 25–29.
- 55 Solving the length problem for the special linear group over the quaternions. (with J. Malzan) *Algebras, Groups and Geometries* **6** 2 (1989) 135–152.
- 54 Transvections as generators of the special linear group over the quaternions. (with J. Malzan) *J. Pure Appl. Algebra* **57** (1989) 25–31.

- 53 Length theorems for the general linear group of a module over a local ring. (with Huberta Lausch) *J. Austral. Math. Soc. Ser. A* **46** (1989) 122–131.
- 52 Products of quasireflections and transvections over local rings. (with R. Frank) *J. Geometry* **31** (1988) 69–78.
- 51 Products of reflections in $GL(n, H)$. (with J. Malzan) *Linear and Multilinear Algebra* **20** (1987) 281–324.
- 50 Factorization of transformations over a local ring. (with H. Ishibashi) *Linear Algebra Appl.* **85** (1987) 17–27.
- 49 Products of half-turns. *J. Algebra* **99** (1986) 275–294.
- 48 Products of elations and harmonic homologies. *Canad. Math. Bull.* **28** (1985) 397–400.
- 47 A homogeneous description of inhomogeneous Minkowski groups. (with H. Hähl) *Geom. Dedicata* **17** (1984) 79–85.
- 46 The Minkowski group. *Geom. Dedicata* **15** (1984) 363–375.
- 45 Bireflectionality of the weak orthogonal and the weak symplectic groups. (with R. Frank and W. Nolte) *J. Algebra* **88** (1984) 63–67.
- 44 Cyclic decomposition of unitary spaces. *J. Geometry* **21** 2 (1983) 101–107.
- 43 The length problem in classical groups (Abstract). Conference on Geometry, March 1983, Haifa University, Israel. *J. Geometry* **21** (1983) 4.
- 42 Factorization of isometries in O^+ into half-turns. *C. R. Math. Rep. Acad. Sci. Canada* **5** 5 (1983) 229–232.
- 41 Bireflectionality. *Ann. Discrete Math.* **18** (1983) 333–334.
- 40 Projective collineations as products of homologies, elations, and projective reflections. *Aequationes Math.* **25** (1982) 103–114. Short communication: *Aequationes Math.* **25** (1982) 116–117.
- 39 Relations in the projective general linear group and in the affine subgroup. *J. Algebra* **77** (1982) 333–337.
- 38 Bireflectionality of orthogonal and symplectic groups. (with W. Nolte) *Arch. Math. (Basel)* **39** (1982) 113–118.
- 37 Skew affinities. *Geom. Dedicata* **12** (1982) 17–24.
- 36 Products of axial affinities and products of central collineations. *The Geometric Vein*, Springer-Verlag, New York 1982, 465–470.
- 35 Radical relations in orthogonal groups. (with W. Nolte) *Linear Algebra Appl.* **38** (1981) 135–139.
- 34 Relations in hyperreflection groups. *Proc. Amer. Math. Soc.* **81** 167–171.
- 33 Defining relations for the equiaffine group. *Geom. Dedicata* **10** (1981) 177–182.
- 32 Generators and relations for classical groups. *Geometry and Differential Geometry*, Haifa, Israel 1979 (Proceedings). *Lecture Notes in Math.* 792, Springer-Verlag, Berlin-Heidelberg-New York 1980, 40–45.
- 31 Perpendicularities and semisimilarities. *C. R. Math. Rep. Acad. Sci. Canada* **1** 6 (1979) 287–291.
- 30 Products of two involutory matrices over skewfields. *Linear Algebra Appl.* **26** (1979) 59–63.
- 29 Factorization of affinities. *Canad. J. Math.* **31** 2 (1979) 354–362.
- 28 Radical relations in unitary, symplectic, and orthogonal groups. *J. Reine Angew. Math.* **306** (1979) 1–6.
- 27 Relations in classical groups. *J. Algebra* **51** 1 (1978) 19–24.

- 26 Decomposition of equiaffinities into reflections. *Geom. Dedicata* **6** 3 (1977).
- 25 Decomposition of orthogonal, symplectic, and unitary isometries into simple isometries. *Abh. Math. Sem. Univ. Hamburg* **46** (1977) 97–127.
- 24 Bireflectionality in classical groups. *Canad. J. Math.* **29** 6 (1977) 1157–1162.
- 23 The length problem for the equiaffine group of a Pappian geometry. *Rend. Mat. (6)* **2** Vol. 9 (1976) 327–336.
- 22 The length of a unitary transformation for characteristic 2. *J. Reine Angew. Math.* **281** (1976) 6–12.
- 21 The length of a unitary transformation. *J. Reine Angew. Math.* **281** (1976) 1–5.
- 20 Il problema della lunghezza nel gruppo delle equiaffinità. Lecture Notes on Classical Groups (in Italian), Istituto di Geometria, Università di Bologna 1975.
- 19 Generators of the unitary groups of characteristic 2. *J. Reine Angew. Math.* **276** (1975) 95–98.
- 18 The classical Euclidean and the classical hyperbolic geometry. (with H. Karzel) Fundamentals of Mathematics, Vol. II: Geometry. MIT Press, Cambridge, Mass. (1974) 174–197; English translation of [15].
- 17 Zur Geschichte der Erzeugung von Bewegungsgruppen. (with R. L. Patton) *Mitt. Math. Gesellschaft Hamburg* **10** 2 (1973) 109–223.
- 16 Hyperfree extensions. (with D. H. Row) *Abh. Math. Sem. Univ. Hamburg* **37** (1972) 46–49.
- 15 Die klassische euklidische und hyperbolische Geometrie. (with H. Karzel) Grundzüge der Mathematik, Band 2: Geometrie, 2. Auflage. Vandenhoeck und Ruprecht, Göttingen (1971) 187–213; 2nd edition.
- 14 Hyperfreier projektiver Ebenenabschluß. Geometriekolloquium 1971, Technische Universität München, Institut für Geometrie, Bericht Nr. 7112 (1971) 5–8.
- 13 Involutory incidence spaces. (with H. Karzel) *J. Geometry* **1.2** (1971) 117–126.
- 12 Koprodukte von Bewegungsgruppen. *Abh. Math. Sem. Univ. Hamburg* **34** (1969) 1–10.
- 11 Eine Bemerkung über zweiseitige Inzidenzgruppen. *Abh. Math. Sem. Univ. Hamburg* **33** (1969) 1–3.
- 10 Kommutative Inzidenzgruppen vom Exponenten n . *Abh. Math. Sem. Univ. Hamburg* **31** (1967) 247–252.
- 9 Die klassische euklidische und hyperbolische Geometrie. (with H. Karzel) Grundzüge der Mathematik, Band 2: Geometrie. Vandenhoeck und Ruprecht, Göttingen (1967) 187–213.
- 8 Incidence groups of exponent n . Proceedings of the Projective Geometry Conference 1967, University of Illinois at Chicago Circle (1967) 29–32.
- 7 Endliche Inzidenzgruppen. (with H. Karzel) *Abh. Math. Sem. Univ. Hamburg* **27** (1964) 250–264.
- 6 Kennzeichnung elliptischer Gruppenräume. (with H. Karzel) *Abh. Math. Sem. Univ. Hamburg* **26** (1963) 55–77.
- 5 Einbettung eines Desarguesschen Ebenenkeimes in eine projektive Ebene. (with E. Sperner) *Abh. Math. Sem. Univ. Hamburg* **25** (1962) 206–230.

- 4 Involutionische Geometrien. (with H. Karzel) *Abh. Math. Sem. Univ. Hamburg* **25** (1961) 93–104.
- 3 Eine Einführung in die Analysis mittels des Filterbegriffs. (with J. Dzewas and O. Hahn) *Der Math. und Naturw. Unterricht* **12** (1961) 433–448.
- 2 Einbettung einer gruppentheoretisch-absoluten Ebene in eine projektive. Ph. D. thesis, Universität Hamburg 1959.
- 1 Die Bedeutung des Dreispiegelungssatzes in Gruppen, die durch die Erzeugenden a_i und die definierenden Relationen $a_i^2 = 1$ bestimmt sind. Master's Thesis, Universität Hamburg 1956.
